Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 16 September 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Response to Arguments

1. In view of the appeal brief filed on 09/16/04, PROSECUTION IS HEREBY REOPENED. New ground rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

- (1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,
- (2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

2. The rejections (items 3, 5 and 7 set forth in the office action of the final rejection) under 35 U.S.C. 112, first paragraph or 35 U.S.C. 102 are withdrawn. Because the typo in the item 6 of the final rejection was occurred, the change for the rejection made in this office action is treated as the new ground rejection.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2634

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Harrison (US 6,067,324, see paper #4).

As shown in figures 2-4, Harrison discloses a method of multipath combining, comprising:

(1) regarding claim 1:

forming at least one matrix of covariances (R_A) of multipath inputs from a single receiver antenna (column 5, line 64-column 6, line 29, note: the autocorrelation function (matrix) is normalized version of the covariance function (matrix) and refer to textbooks and publishes related to Covariance, Correlation, and Autocorrelation);

finding an eigenvector of the matrix (column 6, lines 23-36); and

combining (254 in figure 3) the multipath inputs relatively weighted according to the components of eigenvector (see $W_1 \dots W_n$).

(2) regarding claim 2:

wherein the eigenvector is associated with a maximal eigenvalue of the matrix (see 274 in figure 4).

Allowable Subject Matter

5. Claims 4-9 are allowed.
6. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
7. The following is a statement of reasons for the indication of allowable subject matter: the prior art fails to teach and suggest a method of multipath combining, comprising forming a first and a second matrix of covariances and an estimation matrix from the first and second matrices as recited in claims.

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shuwang Liu whose telephone number is (571) 272-3036.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Chin, can be reached at (571) 272-3056.
